

# HEALTH, SAFETY AND ENVIRONMENT (HSE) POLICY

---

Borusan Vobarno Tubi S.p.A. is fully aware that a responsible economic strategy aimed at HSE issues deriving from its activities of cold drawing of tubes through sharpening processes, heat treatments, surface treatments using chemical processes, is essential for its success and that of its customers.

The company also recognizes that continuous improvement of its HSE performance has led to significant commercial and economic benefits.

Borusan Vobarno Tubi S.p.A. intends to achieve its objectives and goals through the following actions:

- ensure that its activities are carried out in accordance with the provisions of the law in force;
- implement and maintain an effective Environmental Management System according to the requirements of the UNI EN ISO 14001:2015 standard; implement every effort in organizational, operational and technological terms to prevent water, air and soil pollution and aggravate its noise impact;
- minimizing energy and water consumption and waste production, favoring its recovery where possible;
- define HSE objectives and targets, to be integrated with the operational management of the plant and the company's development programs;
- ensure that the HSE policy set out herein and the related management system are understood, implemented and kept active at all levels of the organization and that the system is supported by periodic and systematic education and training activities;
- ensure that this document is available to the public and to interested parties outside the production site.

The Management is the figure who has specific authority to:

- ensure that an Environmental Management System is established, applied and maintained;
- ensure the promotion of awareness and the importance of compliance with the HSE policy throughout the organization.
