

Energy Policy

Our Energy Policy undertakes to;

- Comply with national and international legal legislation and other requirements on energy use, consumption and efficiency,
- Operate by supplying all information and resources necessary for an energy management system that aims for continuous improvement in line with our goals and objectives,
- Follow new technologies in production and all our processes,
- Procure energy-efficient products and services and contribute in the improvement of the energy performance,
- Cut down energy losses by making efficient use of energy and natural resources,
- Engage in effective communication with all stakeholders and raise awareness of energy efficiency in the society and our employees,
- Create measurable performance indicators and follow our development through regular audits and reports.
