

Occupational Health, Safety and Environmental Policy

As an enterprise that also has a say in Türkiye and the world in its main business – steel pipes, and aims to create a safer and healthier work environment for its employees, customers and suppliers; achieve its “zero work accident” ideal; and protect our environment as we manufacture, all of Borusan Pipe’s employees and management pledge to adopt and implement a management system that;

- Complies with all Occupational Health, Safety and Environmental Protection laws, regulations, and other applicable requirements in effect;
- Identifies all possible risks that emerge as a result of its operations and launches efforts to reduce any such risks to an acceptable minimum;
- Strives to minimize the resulting waste, and eliminates the waste that could not be prevented in an environment-friendly manner;
- Reduces the consumption of natural resources to an acceptable level;
- Constantly controls the system and activities it put in place and keeps them open to control by the relevant parties;
- Is built on the principles of continuous improvement.

Acting in line with an approach that is integrated with the community and the environment, Borusan Pipe keeps its Occupational Health, Safety and Environmental Protection policy publicly accessible on its website, newsletters, and notice boards. Furthermore, contractors and suppliers are also notified of our OHS and Environmental policy in a letter during their onboarding process.

Contractors working on behalf of Borusan Pipe are also encouraged to comply with the Occupational Health and Safety provisions prescribed by the laws as well as Borusan Pipe OHSE management and principles.
